Logistics Management Division Acquisition Logistician

Position Description:

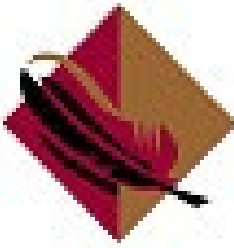

The Department of War (DoW) Acquisition Logistician position specializes in program logistics documentation production, standard operating procedures, policies, exception to policy, and associated products. The Acquisition Logistician will play a vital role in ensuring accurate and compliant documentation, contributing to the success of the acquisition program and the sustained support of Army materiel.

Responsibilities:

- Production of Acquisition documentation such as Life Cycle Sustainment Plans (LCSP), Acquisition Strategies, etc.
- Type classification, and materiel release documentation generation
 - Ensure compliance with US Army Type classification and material release requirements
- Assist in the development of product training material/documentation and plans
- Conduct basis of issue planning (BOIP) to determine resource allocation and distribution
- Provide expertise on Army provisioning processes and requirements
- Collect, interpret, and analyze diverse types of required logistics data including product availability and supply chain impacts, product reliability, product sustainment support, and other data related to product supply chain management, sourcing, and distribution
- Develop briefing materials and effectively present them to senior leadership
- Stay updated on industry best practices and emerging trends in program logistics documentation and Army logistics

Requirements:

- Experience in applying Army Regulation 700-127 and DA PAM 700-127 during the acquisition process, to ensure supportability implications are considered early and throughout the acquisition process to minimize support costs and provide the user with the resources to sustain the system in the field
- Comprehensive understanding of the 12 Product Support elements within an Army program office, including product support management, design interface, sustaining engineering, maintenance planning and management, supply support, support equipment, technical data, training and training support, IT systems continuous
